Dear Sir/Madam,

I am very excited to apply for an internship in your company and I hope I will get the chance to become part of your team.

My Name is Name and my first approach to the Field of study started in 20XX during my work experience/project/other that aimed to develop a small demo of a videogame (example) with others students (what did you do during this experience?). From this (experience/internship/..) I got a lot of knowledge about/ I learned more about how a thing works or about its workflow between the development stages and I learned how to use programs/tools/theoretical experience (explain what you learned and how it helped you for the future).

So far I have focused on improving and learning new techniques and I have done some personal and group projects with other students.

I absolutely love / In my free time / During my school experience (try to give some information about yourself and what You like to do).

I would like to improve and work on something regarding your field of study and your interests.

Thank you for considering my application and I hope we can start working together very soon.

Best regards,
